

Ordering the Hose That Fits Your Central Vacuum System

Universal Inlet Valves

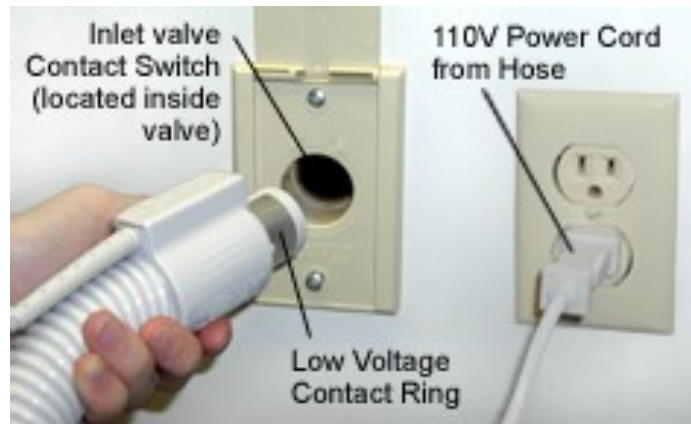

Universal Inlet Valves

The Universal Inlet Valve's low-voltage contact switches are inside the valve opening. The low-voltage connection is made with the low-voltage ring on the hose connects with the brass contact switches inside the inlet valve.

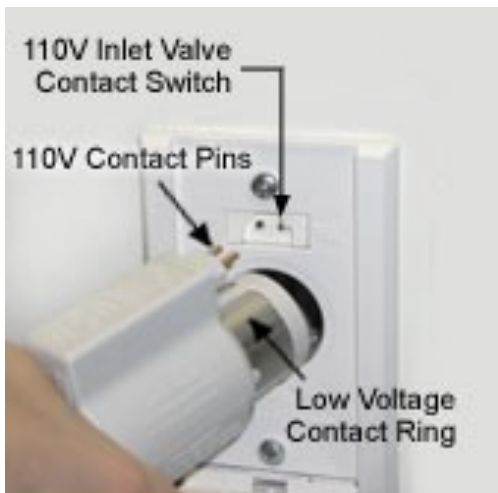

Universal Inlet Valves support electric powerheads and hoses only with a pigtail cord.

Universal Inlet Valves with Pigtail

Direct Connect Electravalses

Direct Connect Electravalses

The Direct Connect Electravalue 110V contact switches are above the valve opening. The electrical connection is made when the pins on the hose are inserted into the contact switch.

Direct Connect Electravalses support electric powerheads and hoses.
